Impressive versatility and incomparable style are the hallmarks of the Connexions 'Living Dining' Collection by John E Coyle. Each piece strikes a perfect balance between hi-tech, ergonomic performance and breath-taking craftsmanship, using the choicest maple, beech and oak veneers to very best advantage and creating the ideal furniture for any living or dining space. Please refer to the 'Range at a Glance' for finishes available for each piece.

Boundless configuration possibilities mean that each piece works well on its own or integrates seamlessly with others to create an arrangement that suits your individual needs. Subtle internal lowlighting, with soft touch adjustment, creates instant atmosphere and sets the mood for any occasion.

The Connexions range blends elegant style with superb materials to create pieces whose form and function are in perfect harmony with your style of living. Our truly integrated portfolio of freestanding pieces enables you to mix styles and finishes to achieve a seamlessly calm look that is classically contemporary. Follow our suggested standard arrangements or create a layout that meets your particular storage requirements. The only limit is your imagination.

For optimal convenience, there is a choice of sideboards, ranging from the sleek lines of the 8590 five drawer unit, to the elegant three door 8580 unit, with internal lowlighting.

Let our 'Living Dining' Collection create an intimate and elegant atmosphere that reflects your mood, through an aesthetic interplay between fit, finish and layout. The pure, clean lines of these pieces offer the latest in design trends, with styles that exude quality and create a truly individual look.

Quality is the key word and it is found in the fittings used throughout the range, from the ergonomically formed handles and robust levellers for aiding alignment on uneven floors, to the aesthetically pleasing soft touch lighting supplied as standard with all display units.

Each piece functions perfectly on its own or integrates seamlessly with others to create an arrangement that suits your individual needs. Optional mirror backs are available on 8500 corner and 8510 bowed display units.

Arrangement 3.4 L182 (71³/₄") x L182 (71³/₄") x D100 (39¹/₂") x H45.8 (18"), Oak

When it comes to compact living, our exemplary choice of tables and chairs means there's no need to compromise on style or functionality. We use our traditional cabinet making skills throughout the construction process, to give each piece an integral strength and a timeless character.

Words alone cannot convey the appeal of these superb tables and chairs. Why not visit your local stockist for a personal consultation to create a look that's unique to your home. Your local Connexions stockist will also have an up to date selection of the fabric options available on dining chairs.

Product Information

Wood is a natural product and it will inherently vary in structure, colour and grain. Part of the attraction of wooden furniture is that no two pieces of veneer or solid timber are the same and consequently slight colour variations may occur from piece to piece, particularly if they are ordered at different times. Occasional dark spots called 'sugar marks' are naturally present and should not therefore be viewed as blemishes but rather as a characteristic of the timber or veneer.

All natural timber surfaces are prone to fading or discolouration if they are subject to direct or indirect sunlight. It is important therefore, that any ornaments, lamps, books etc. are moved periodically to avoid permanent shading.

Connexions is made using the finest materials and will require the minimum of care to maintain its excellent condition for many years. Surfaces have a hard wearing lacquer finish that conforms to BS 6250. While this finish is ideal for today's demanding lifestyle, it could be damaged by the use of detergents, aerosol waxes and polishes and it is therefore recommended that these are not used. Generally a regular dust combined with an occasional wipe with a soft damp cloth for more stubborn dirt, followed by a dry duster, is sufficient to keep your furniture looking great.

All units conform to BS 7449/BS 7376 glass and safety requirements and BS 4533 electrical requirements. Care should be taken to disconnect the electrical supply before changing any light bulbs. Display units and Arrangements are automatically supplied with a Light Assembly (consisting of a touch button on/off switch, transformer, cable and mains plug.) A maximum of five separate light fittings (max. 105 watts) may be connected to any one Light Assembly within an Arrangement.

Do not place hot dishes or plates onto any shelf, cabinet or table top. It is recommended that you use suitably insulated table mats which should be removed as soon as possible after use. Spilled liquids or food should be wiped off immediately and the surface thoroughly dried. Care should be taken to avoid overloading or placing undue strain on drawer runners and door hinges. In addition, do not overload shelves, especially glass shelves, with heavy items.

Arrangement 3.6, Maple (D60.5)

We recommend that units within an arrangement be connected together (top to base, left to right). Connecting bolts/brackets and instructions will be supplied with all arrangements. Floor standing units will be supplied with levellers to aid alignment on uneven floors. To ensure complete stability, we recommend that wall fixing brackets, are used to secure units to the wall.

A selection of fabrics is available for dining chairs in the range, please refer to your local stockist.

All dimensions are approximate and are indicated in metric (centimetres) with the imperial equivalent in brackets (rounded up to the nearest quarter of an inch). Metric measurements should be used for accuracy. Measurements shown are external (Length x Depth x Height) with the internal dimensions noted where appropriate.

Connexions is available in three finishes, Beech (B), Maple (M) and Oak (O). Please suffix the model number with B, M or O. Certain items are only available in specific finishes, please refer to range at a glance section.

Designing your own arrangement

Simply decide on your specific storage and display requirements. Choose from base, $\frac{1}{2}$, $\frac{3}{4}$ or full height units. Units may be linked together or may stand alone as freestanding pieces.

When designing an arrangement where a Corner TV Base Unit is used, we recommend the use of base units (8110, 8120, 8130, 8140 or 8170) next to the Corner TV unit, to facilitate a better television viewing angle.

Check the dimensions of all units before ordering using the 'Range at a Glance' section of this catalogue, especially the length of a run of units and the overall height.

A sketch drawing should accompany all customer own design arrangements to ensure the correct fittings are supplied with the order.
