### Product Information

Wood by its nature is a natural product and it will inherently vary in structure, colour and grain. Part of the attraction of wooden furniture is that no two pieces of solid timber are the same and consequently colour variations may occur from piece to piece, particularly if they are ordered at different times. Extremes of heat and moisture may adversely affect the timber and should be avoided.

All natural timber surfaces are prone to fading or discolouration if they are subject to direct or indirect sunlight. It is important therefore, that any ornaments, lamps, books etc. are moved periodically to avoid permanent shading.

Hampton is made using the finest materials and will require minimum care to maintain its excellent condition for many years. While this finish is ideal for today's demanding lifestyle, it could be damaged by the use of detergents, aerosol waxes and polishes and it is therefore recommended that these are not used. Generally a regular dust combined with an occasional wipe with a soft damp cloth for more stubborn dirt, followed by a dry duster, is sufficient to keep your furniture looking great.

All units conform to BS 7449 glass and safety requirements. A selection of chair fabric options is available from your local stockist.

Do not place hot dishes or plates onto any surface. It is recommended that you use suitably insulated table mats which should be removed as soon as possible after use. Spilled liquids or food should be wiped off immediately and the surface thoroughly dried. Care should be taken to avoid overloading or placing undue strain on drawer runners and door hinges. In addition, do not overload shelves, especially glass shelves, with heavy items.

It is the policy of John E. Coyle Ltd. to continuously improve the product range and therefore, we reserve the right to alter material or component specification and prices without prior notice. Whilst every care has been taken to ensure the accuracy of this price list/catalogue, we cannot accept liability for mistakes as a result of limitations inherent in the photographic and printing process that may lead to variations in items such as the colours portrayed.
